## Detroit History Museum Detroit, Michigan

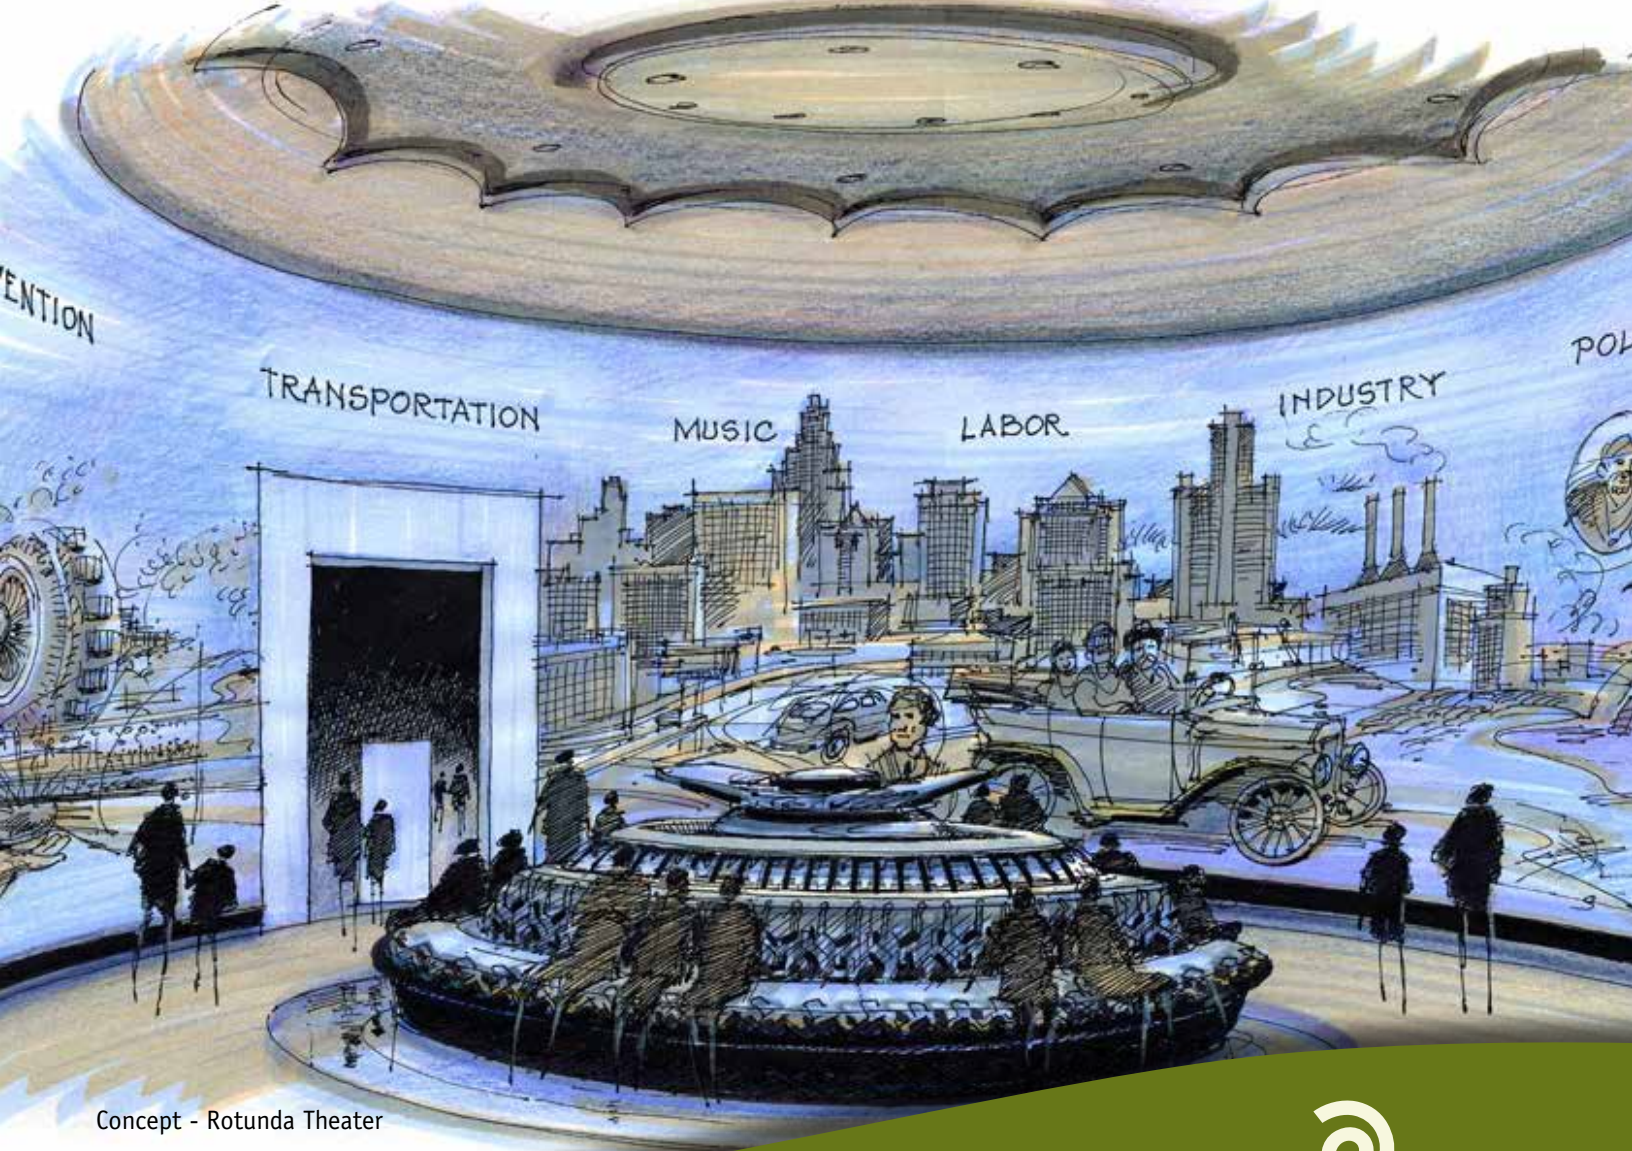

Square Footage: 120,000 sq. ft.  
Budget: \$100,000

Architect: Albert Kahn Associates

### Scope of Work: Exhibit Master Plan

The proposed new addition to the Museum would virtually re-create the Museum to focus on Detroit's emergence in the 20th Century as the cradle of American automobile culture. Twelve galleries would provide space to create both exhibits and changing exhibits celebrating the people, the industry, and the music that create Detroit's modern history.
